

THE HUMAN IMPACT OF POLITICAL GLOBALIZATION

WIDENING INEQUALITY

The rich get richer while the poor get poorer. There's a big and growing gap between the wealthy few and the many who struggle to get by.

UNFAIR TREATMENT FOR WORKERS

Many workers endure low pay, unsafe conditions, and long hours. They work tirelessly but still don't earn enough to meet their needs.

POWER IMBALANCE

Ordinary people feel powerless while a small group of powerful people control society and make all the big decisions. The leaders seem untouchable, while the common people feel helpless.

WAR

Society is split into opposing groups fighting against each other. There's constant conflict, as people argue and take sides.

CONFLICT AND DIVISION

People feel pressured to pick sides in the divided society. They feel like they must choose between opposing groups, creating tension and uncertainty.
